

CAT Soft Touch Tires

for the King Air F90, 100, and
200 Series

CAT Soft Touch Tires: High Flotation Gear Performance with no modifications to your aircraft.

Experience the softer ground roll, increased landing options, and greater safety of High Flotation Gear (HFG) without the hassle. Created in direct response to client requests, CAT Soft Touch Tires are bigger, stronger, 10-ply tires that provide all the benefits of HFG and fit into standard-gear wheel wells.

Performance

Experience softer taxiing, takeoffs, and landings on hard surfaced runways, and expand landing options to include soft-field capabilities. Using thicker, more durable tires with 67% more buoyancy than stock, CAT Soft Touch Tires provide the ruggedness and utility operators need to access more remote areas while adding cushion and comfort to every landing.

Safety

47% of all rejected takeoffs and landings are from tire failure, and 75% result in the aircraft departing the runway. Decrease chances of a tire blowout and feel safer with sturdier,

Increase buoyancy by 67%, increase tire life by 30%, and raise prop clearance by 3/4" without the expense, downtime, and hassle of installing High Flotation Gear.

more reliable CAT Soft Touch Tires. Hydroplaning is also minimized during inclement weather, and with access to more remote airports, enjoy the comfort of knowing there is a closer stop in case of an emergency or unscheduled landing.

Safer, longer-lasting Soft Touch Tires allow operators soft field takeoff and landing capabilities, increasing landing options and allowing access to more remote airfields.

Savings

Because CAT Tires are a simple tire upgrade and do not require expensive strut replacement or gear door modification, they offer all the benefits of High Flotation Gear at a fraction of the cost.

CAT Soft Touch Tires also have the added benefits of increasing tire life by 30% and raising prop clearance by 3/4". Save on operating costs by replacing tires less often and reducing maintenance on expensive FOD repairs.

- Options for Michelin or Goodyear tires (Goodyear tires recommended for Cleveland Wheels and Brakes).
- FAA and EASA certified
