WINTER IS ALMOST HERE!

With cold, windy, and possibly snowy months ahead, protect your aircraft with a set of CAT Stack covers and prop straps! Available for all makes and models.

Introducing..

CAT Exhaust Stacks for the King Air C90A, C90B, and F90-1

CAT Stacks have long been a part of increasing performance and ramp appeal on King Airs. We have just finished production on our new line of stacks, so now C90A, C90B, and F90-1 operators can enjoy the benefits as well!

Designed to replace the OEM exhaust gas extractors and improve on them in every way, here is what CAT Stacks can do for you:

- ✓ **Significantly reduce nacelle sooting**
The venturi-shaped design directs exhaust away from nacelles and wing trailing edges, keeping your aircraft cleaner, longer.

- ✓ **Increase performance**
Operators reported gains of 4-9 knots in King Air 90s, 8-11

knots in King Air 200s, and lower ITTs by 20 degrees.

- ✓ **Increase fuel efficiency**
Operators also reported 20 lbs/hr per engine fuel savings-- a 10% reduced fuel burn during cruise flight!
- ✓ **Increase ramp appeal**
Stainless steel material and ceramic coating means CAT Stacks will never change color or lose their shine.
- ✓ **Reduce cracking**
The streamlined design reduces the surface area of the stack hitting the airstream, lessening the effect of the temperature differential between the outside air and stack temperature and virtually eliminating cracks.

This means, in terms of operating costs alone, your CAT Stacks will pay for themselves in just two years or less!

Operators of virtually any model King Air 90 or 200, now including C90A, C90B, and F90-1 operators, have much to gain by upgrading to CAT Exhaust Stacks. Why wait any longer to make the switch? Call us today!

LABACE Convention in Sao Paulo

CAT's Jen Amundsen attended LABACE in Sao Paulo last month. An excellent convention, connecting and strengthening the relationships between CAT and it's South American customers, FBO's, owners and operators.

Also attending was Blackhawk Performance Enhancements, BLR Performance Innovation and Raisbeck Engineering.

Pictured: Matt Shieman (Blackhawk), Pieiro Baisso, Bobby Patton (Blackhawk), Jen Amundsen (CAT), Sam Jantzen (Raisbeck Engineering), and Jose Carlos.

PLANNING TO BUY OR SELL AN AIRCRAFT?

Let CAT's experienced professionals help! We understand the aircraft marketplace by utilizing the best analytical tools and watching for trends on a daily basis. With turnkey services and everything in between, CAT can get it done for you.
